

VACCINATIONS REQUIREMENTS

Horses must meet both the requirements for permanent entry and racing for Equine influenza.

Within 60 days of export but NOT within 14 days of export the horse must be administered the following:

- Either a valid primary course consisting of two vaccinations 21 - 42 days apart with the same vaccine (both doses must be administered within the 60 days but not within 14 days of travel)
- Or a booster to a valid primary vaccination (21 - 42 days apart with the same vaccine) - boosters must be given within 6 months of the primary course, and within 6 months of each booster vaccination. The most recent booster must be within 60 days but not within 14 days of shipping.

If the primary course in the passport does not meet with the required 21 - 42 day interval, or both doses were not the same vaccine then a new primary course **MUST** be given.

If there is more than 6 months between any booster doses a new primary course **MUST** be given.

If you are considering travelling your horse to DUBAI Racing Carnival or DWC please urgently send a colored scan of the passport vaccination pages to your designated shipping agent so that they can advise if there is any action to take in this regard to ensure shipping.

Please refer to the ERA rule of racing below for clarification on the racing component.

- (a) that the Horse has received a primary Course of vaccination consisting of two vaccinations given no less than 21 Clear Days apart and no more than 60 Clear Days apart.
- (b) in addition, where sufficient time has elapsed subsequent to the primary vaccinations, the Passport must be similarly endorsed to show that the Horse has received a booster vaccination no less than 120 Clear Days and no more than 180 Clear Days after the second vaccination of the primary Course of vaccination.

Please contact Dr. David for any clarifications on individual cases:
